EXPERIENCE

Web & CRM Developer

Jan 2026 - Jun 2026 | 6 months

- Developed and maintained custom CRM systems to streamline client and business data management.
- Designed, built and deployed responsive websites based on client requirements.
- Worked across front-end and back-end functionality to deliver smooth user experiences.
- Debugged and optimized existing code to improve reliability and performance.
- Coordinated with clients and stakeholders to translate requirements into working features.

SELECTED PRACTICAL WORK

Hostel CRM / Hostel Management Systems

Built and iterated on practical hostel-management workflows including student billing, payment status, floor/room/bed management, notifications and configurable bank QR details. Worked primarily with PHP and MySQL.

HostelHub - SaaS Product Planning & Development

Developing a streamlined hostel-management product concept with separate Super Admin and Hostel Owner roles, subscription/renewal visibility and a focus on keeping the interface simple for daily hostel operations.

Portfolio & Web Deployment

Built and deployed a modern responsive portfolio using a Vite/React/TypeScript workflow, GitHub version control, Vercel deployment and custom-domain DNS configuration.

JARVIS-OS - Personal Software Project

Planning and developing a Python-based personal software project as part of ongoing programming and automation learning.

CORE STRENGTHS

Problem solving & analytical thinking • Communication & teamwork • Fast learning and adaptability • Organized task management • Requirement-to-feature translation • Practical debugging
